### PORTFOLIO OVERVIEW & DIVERSIFICATION CHARACTERISTICS

*\*Institutional quality private equity refers to a portfolio of investment exposures that are typically only available to institutional investors as well as one that provides broad exposure by vintage year, sector, geography and sponsor. <sup>2</sup> Vintage year refers to the year of fund formation and/or its first takedown of capital. Based on NAV as of 1/31/2024. Excludes cash and liquid investments. Late primaries defined as funds with 30% or more capital drawn at or near date of first investment. Past performance is no guarantee of future results. Information is subject to change. <sup>1</sup>Investors should not expect to be able to sell shares. There are many restrictions to redeem and investors cannot redeem shares upon demand or in the quantity desired. \*The Fund, in its sole discretion, may accept investments below the minimum. Investors subscribing through a given broker/dealer or registered investment adviser may have shares aggregated to meet these minimums, so long as denominations are not less than \$50,000 and incremental contributions are not less than \$25,000.*

## MONTHLY UPDATE AND PORTFOLIO COMMENTARY – JANUARY 2024

The Evergreen Fund's dealmaking started off the year strong with two new investments executed totaling \$7.7m in deployment. The first was a \$5m no fee, no carry equity co-investment in a leading Communication Platform as a Service ("CPaaS") solution purpose built for utilities to reach their customers effectively across different mediums (text, e-mail, etc.). The company has compelling top line growth, an attractive margin profile, industry leading gross and net retention rates, and provides a tangible value proposition to a set of stable, highly regulated clients. The second investment was a \$2.7m investment in a seasoned primary alongside a high conviction existing sponsor relationship. The Fund had already made a commitment to their prior fund in addition to two co-investments with all three investments performing ahead of plan and generating significant value for the portfolio. The investment thesis is focused on doubling down on sponsors with proven value creation capabilities and domain expertise in the lower middle market with an ability to drive growth through operational enhancements.

The Fund has also recently witnessed a material pickup in exit activity with the portfolio realizing several liquidity events across both equity and credit. Project Magnolia, an equity co-investment the Fund invested in 2021 was sold in January, producing a solid return in addition to \$5m of liquidity to redeploy efficiently into 2024 deals. This trend of accelerating exit activity also correlates to the Fund's investment pipeline, with the portfolio's deal flow robust across all transaction types and asset classes.
